Water Purifier Dispenser- Desktop

Home or office drinking water solution - A complete solution for your home and office drinking water needs. Installing a Konia drinking water filter in your home or office allows you to enjoy an unlimited supply pure drinking water, free from contaminants and revitalized by the Pi Water Mineralizer.

Cost savings – These filtered water dispensers offer a complete replacement for all bottle water dispensers, bottled water purchases and delivery and storage of bottled water – saving you money.

Design - The sleek designs of these water purifier units are perfect for the office water cooler or home water dispenser.

Hot and cold water on demand - These point of use purifiers serve the filtered water either hot or cold. If you prefer room temperature water, the units have a switch at the back to turn off the hot and cold water.

Advanced Water filtration technology - Konia’s water cooler dispensers have up to 7-Stages of integral water processing ensuring a constant supply of water to the highest quality without the inconvenience and unnecessary cost of bottle water dispensers.

Easy installation & service - They are easily installed, water efficient, don’t require drainage and are economical to operate. Site servicing of all products is provided to ensure proper operation and optimum water quality output at all times.
